**Counter insurgency tracker training (CIT- Training) testimonial.**

We at Akagera National Park requested for Mr Liebenberg and Mr Patrick with their team to come and train the Akagera National Park rangers. Over the past 6 years the park has done a lot of ranger based trainings, and we try and make it an annual routine. This year we decided to change the focus and contacted CIT Training, so that the key focus of the capacity building of the rangers would be to be more efficient in the field when monitoring for illegal activities.

CIT training staff were very professional in the preparation of the course and also in the implementation. All the park rangers participated in the course and they came out with rave reviews that this was the best team of instructors yet to conduct a training. The absorption of the rangers and continued eagerness along with the vast improvement of the efficiency of the teams/rangers in the field is testimony to a great training. On behalf of all the rangers we sincerely appreciate all the hard work you put into the course and hope to see you in the future again.
